- Presidents's List
- STEM Scholar Award 2017

Technologies

- C#/.NET Core
- Python
- Linux
- Bash
- HTML
- CSS/SCSS
- Continuous Integration
- Docker
- Git

Software Development Experience

GovLib

A .NET Standard library for interacting with US government APIs. This library defines common interfaces and caches API calls to improve API consistency. Currently supports ProPublica's congress API.

netpkg-tool

A command line utility written in C# for packaging .NET Core applications into Linux binaries. Applications are packaged into the AppImage format for distro-agnostic Linux packaging.

Shell.NET

A NuGet library to simplify the process of executing bash commands and storing their result. Shell.NET is .NET Standard compliant and compatible with Windows 10 using the Windows Subsystem for Linux.

RogueOneBot

A Reddit bot that monitors Star Wars related subreddits for misspellings of the movie "Rogue One" and offers a friendly spelling correction for the poster.

Personal Page

My personal page including links to projects, resume, and development blog. Written in HTML/CSS and featuring extensive customization of the default Bootstrap template. Powered by Jekyll and Liquid templates.
