Technologies:

- C#/ASP.NET Core
- Python
- Linux
- Bash
- HTML
- CSS/SCSS
- Continuous Integration
- Docker
- Git

Open Source Projects:

GovLib

.NET Standard library for interacting with US government APIs. This library defines common interfaces and caches API calls to improve API consistency.

netpkg-tool

A command line utility written in C# for packaging .NET Core applications into Linux binaries. Applications are packaged into the AppImage format for distro-agnostic Linux packaging.

Shell.NET

A NuGet library to simplify the process of executing bash commands and storing their result. Shell.NET is .NET Standard compliant and compatible with the Windows Subsystem for Linux.

RogueOneBot

A Reddit bot that monitors Star Wars related subreddits for misspellings of the movie "Rogue One" and offers a friendly spelling correction for the poster.

Personal Page

My personal page including links to projects, resume, and development blog. Written in HTML/CSS and featuring extensive customization of the default Bootstrap template.
