---

## Education

### Georgia State University

B.S. Computer Science

- January 2016 - Present
- Expected Graduation: June 2020
- 3.7 GPA
- Dean's List
- Presidents's List
- STEM Scholar Award 2017

## Software Development Experience

### netpkg-tool

A command line utility written in C# for packaging .NET Core applications into Linux binaries. Applications are packaged into the Appliance format for distro-agnostic Linux packaging.

### Shell.NET

A Nuget library to simplify the process of executing bash commands and storing their result. Shell.NET is .NET Standard compliant and compatible with Windows 10 using the Windows Subsystem for Linux.

### Personal Page

My personal page including links to projects, resume, and development blog. Written in HTML/CSS and featuring extensive customization of the default Bootstrap template. Powered by Jekyll and Liquid templates.

## Technologies

- C#/.NET Core
- Python
- Linux
- Bash
- HTML
- CSS/SCSS
- Continuous Integration
- Docker
- Git

### Arc+

A UI theme for VS Code with design elements inspired by the Arc GTK theme and material design. Three dark color variants and one light variant are available.

### RogueOneBot

A Reddit bot that monitors Star Wars related subreddits for misspellings of the movie "Rogue One" and offers a friendly spelling correction for the poster.

---
